

THE McKINLEY MINING AND SMELTING CO.

Sends New Year's Greeting to the People of Washington, D. C.

It May Interest You to Know and It Will Profit You to Remember—

WHERE WE ARE. {

Our Washington offices are located at Suite 25-26, Adams Building, 1333 F Street N. W., Washington, D. C.
Our mines, twenty-three in number, and all valuable, are situated at Ely, White Pine county, Nevada.

WHAT WE ARE.... {

A corporation formally and duly organized to develop and operate a legitimate mining enterprise, too vast to be properly and successfully prosecuted by an individual or firm.

WHO WE ARE.....

Our Directorate is composed of the following careful and conservative business men, and this Directorate was submitted to and approved by the late President William McKinley:

DIRECTORS:

M. C. BARBER, Canton, Ohio.
DIX W. SMITH, Elmira, N. Y.

Counselor at Law.
W. N. MCGILL, McGill, Nev.,
Capitalist and Mine Owner.

FRED MORCK, Warren, Pa.,
Oil Producer.

T. P. OTIS, Wellsville, N. Y.,
Director Citizens' National Bank.

F. E. FITCH, Elmira, N. Y.,
Director Second National Bank, Train Master Penn. Railroad.

A. J. HAZELTINE, Warren, Pa.,
President Warren Savings Bank.

B. W. GOODSELL, Chicago, Ill.
Goodsell Packing Company.

J. A. YERINGTON, Carson City, Nev., Chairman Nevada State Board of Commissioners, Pan-American Exposition.

PROF. GEORGE A. TREADWELL, New York City,
Geologist and Metallurgist, 27 William Street.

WILLIAM E. SHEPHERD, N. Y.

M. H. MOORE, Lancaster, Pa.,
Director First National Bank.

W. J. HAERTHER, Philadelphia, Pa.,
Hurd, Haerther & Co., Bankers and Brokers,
Drexel Building.

W. N. MCGILL, Mgr. Director.

We urge you to investigate through any bank or commercial agency the standing of these gentlemen.

WHY WE ARE.....

Because we own valuable mines at Ely, White Pine Co., Nevada, that not only defend but warrant and demand our corporate existence.

Because we fully appreciate and will prove faithful to the trust imposed in us.

Because we afford a safe, permanent and profitable investment for the man or woman with a small sum to lay away against the proverbial "rainy day," as well as those who have large means from which they desire to insure an established and increasing income.

Because we offer in the stock of the McKinley Mining and Smelting Company the best mining investment in the United States today.

WHAT WE HAVE.

23 Mines at Ely, White Pine County, Nevada, which have been proved to be very rich in Gold, Silver, Lead and Copper. Of these 23 mines The Saxton and The Aultman are furthest along in the way of full development, although work has been and is being done on all the company's mines, and all are covered by the stock offered.

Over \$250,000 have been well and profitably expended in development work, with results that have surprised mining men who have developed the greatest mines the world has heretofore known.

In the Saxton Mine alone this Company has a vein of gold ore blocked out, 700 feet long, 21 feet wide, and 200 feet deep, averaging \$24 per ton, containing over \$2,676,000 in gold, the vein running true and widening as it descends.

Understand, this ore has been blocked out, its value ascertained and computed. Timber on the stump is not so secure. Money in bank is not so safe.

Besides the gold ore, The Saxton Mine shows large bodies of Copper Ore, running 25% in Copper and practically unlimited in extent.

In The Aultman Mine the shaft is down 300 feet, with a body of Gold Ore opened up 190 feet wide that averages \$5.00 to \$7.00 per ton.

These are but two of 23 mines, and all the others make as good showing for corresponding depths as The Saxton and The Aultman.

The Extent and Character of the Plants which this Company will erect for the reduction of its ores will be determined when the development work, in progress, shall have been completed, at which time, the exact character of the ore will be known, and competent and conservative management will be in position to determine conclusively what kind of reduction plants will give best results at least cost.

The wisdom of this course will be apparent to the most casual observer, but will appeal with full force to those who have been interested in mining enterprises where expensive mills have been erected without sufficient knowledge of the character of the ores, as a whole, and rendered worthless by later developments.

A Mining Committee composed of the following men: Prof. Geo. A. Treadwell of New York City, J. A. Yerrington of Carson City, Nev., and W. N. McGill of Ely, Nevada, who is also in charge of the mines of the Company as Managing Director. These are mining men of eminence, the mere mention of whose names will call to memory the celebrated mines they have developed and with which they have been connected.

A Board of Directors That for high personal character, business ability, and financial standing of its members, is not surpassed by the Directorate of any Corporation in America or in the World.

A Capitalization which was fixed at 1,000,000 shares by WILLIAM McKINLEY, late President of the United States, and cannot be increased.

An efficient, experienced, practical mining man in charge of our mines.

EUGENE GIROUX, the eminent mining engineer of Denver, Col., said during the past month: "Let me tell you something. Within the next five years the Ely Camp will be the greatest copper-gold producer in the United States. You will be able to put the whole 'Tonopah' in one corner of it."

MR. D. H. JACKSON, the old superintendent of THE COMSTOCK, the greatest mine ever operated in the United States, and who is now widely known as a practical miner than any other man, also said during the past month: "If there is a genuine, good, valuable mining proposition in the United States it is found in the property owned by the McKinley Mining and Smelting Company. I know every foot of their ground. I was in the Ely Camp for more than a year and examined the McKinley properties for the late Marcus Daly, and, in company with him, went to Canton, Ohio, to purchase these properties, but we were unable to do so. The Company can refer to me at any time as to the value of properties."

Prof. Geo. A. Treadwell, the celebrated metallurgist of New York City, whose connection with THE UNITED VERDE, THE GREENE CON-SOLIDATED, and other great mines, is well known, said recently, of the McKinley properties: "These mines are in the middle of the big copper belt at Ely, Nevada. When I saw them, capped by the red iron oxide ores, I knew the rich Copper Sulphides must be found at the permanent water level. The Gold intervening between the Iron Oxides and the Copper Sulphides is much richer than usual. Over a million dollars of Gold could probably be milled with ease from the free milling Gold ore already available. Dividends could be paid and the money for development secured in this way. But the Gold bearing oxide ores are a positive necessity in roasting the more valuable Copper Sulphides at the lower level. Without the Gold bearing oxide ore the reduction of the Copper would be very expensive. In using the Gold bearing oxide ore as a flux for the Copper ores every particle of the gold is economically saved. Millions will be made from the Copper and the full development of these remarkable mines will be reached in a reasonable time and at a minimum cost."

"The McKinley Company's Mines are today more promising than the United Verde was at the same stage. The stock is cheap at Five Dollars a share. I have examined probably 500 mines and found a half dozen first-class properties in the lot. The McKinley is one of the best of them. The stock today should be selling at Ten Dollars a share."

CALL OR SEND FOR BOOKLET CONTAINING MINERAL RESOURCES OF NEVADA AND HANDSOME SOUVENIR.

Stock in lots of not less than five shares is offered at \$3.00 per share until January 15, 1903, at which date the price will be advanced to and thereafter held at \$5.00 per share, until further advance. MAKE CHECKS, DRAFTS AND MONEY ORDERS PAYABLE TO
